PROCESSED FLYABLE ACTIVE SUBWOOFER

PRODUCT DESCRIPTION

The FBT MITUS 212FSA powered subwoofer meet the following performance criteria: frequency response of 45Hz to 120Hz, peak output of 138dB half-space. The FBT MITUS 212FSA is a vented band-pass design incorporating 2x12" B&C neodymium magnet high excursion woofers with 3" voice coil. The modularity of the FBT MITUS 212FSA makes it extremely flexible for a wide range of applications, from a small system to an elaborate line array system consisting of up to 12 MITUS 206LA cabinets along with multiple FBT MITUS 212FSA subs for large concert events. The FBT MITUS 212FSA provides a DSP with 8 presets cardioid and infra configurations, delay. The control panel provides XLR «in&link», volume, preset, delay, phase 0°-180°, ground lift switch. The MITUS 212FSA feature Baltic birch plywood construction covered in a scratch resistant black paint with a M20 top-mounted stand adapter.

RECOMMENDED CONFIGURATIONS

MITUS 206L_FLYING

FBT will place at disposal a software called MITUS 206L_FLYING which helps calculating the safety factor of the weakest point of MITUS 206LA - MITUS 212FSA unit suspension system according to the used configuration and a software called EASE FOCUS that permits an accurate simulation of the mechanical and acoustic behaviour of the MITUS series line array system.
